Also available from Portio Research Limited

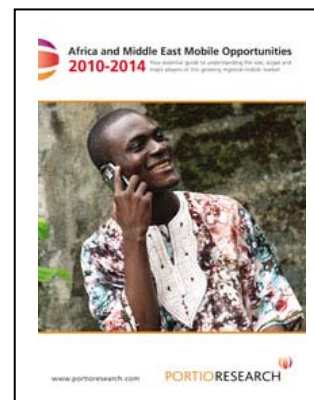

Portio Research Ltd is a UK-based research company focussing on the mobile space, providing reports, handbooks, directories and database products.

New and Best Selling Reports include:

Africa and Middle East Mobile Opportunities 2010-2014:

Packed-full of invaluable data, market sizing and growth forecasts, this must-have new study delivers vital insight into the exciting mobile markets of the AME region. With essential regional, country and operator-level analysis of this growing mobile space, the detailed report includes mobile subscriber, penetration, technology and messaging forecasts; as well as subscriber numbers, service revenues, market share and ARPU data, and strategies and developments of key mobile operators – plus so much more. With the AME mobile market now the subject of intense interest, this essential 96-page market report provides an understanding of the size, scope and major players of this changing mobile market.

Please [click here](#) for more details.

Mobile Payments 2010-2014:

Examining the exciting worldwide mobile payments market, this essential new report delivers analysis of mobile payment services including in-app payments, mobile ticketing and mobile coupons, and identifies the opportunities in the mobile payments space. This invaluable research provides growth forecasts and market sizing; details the various types of mobile payments and different platforms they use; reveals the drivers and challenges affecting mobile payment development; appraises mobile payment business models and compares value chains; and offers supporting case studies and profiles of major markets, key players and successful mobile payment services.

Mobile Messaging Futures 2010-2014:

The highly anticipated fourth edition of our best selling messaging report is now available to order. This new edition is packed with detailed market analysis, traffic and revenue forecasts and a brand new vendor survey. This massive 355-page market study gives you all the data you need for SMS, MMS, mobile e-mail and mobile IM markets worldwide, and includes a BONUS 26-slide Executive Summary presentation. With essential insight into a market that is forecast to be worth USD 233 billion by end-2014, this is one of the most detailed and popular reports ever written on the worldwide mobile messaging market.
